Raffaele/Gianluca

Negroni & friends

The legend of a gentleman

Margarita is an after dinner and is the most common tequila-based cocktail. In other languages: Margarita means "pearl" in Latin, while in Spanish it is the translation of the word daisy. According to William Grimes, author of "Straight Up or On the Rocks: The Story of the American Cocktail", there are many people who claim to have drunk Margaritas as early as the 30s, so it is easy to say that the Margarita was not invented after 1940..

- **Stinger** 16.50
Remy Martin VSOP, Creme de Menthe

The history of the Campari company began in 1860, when Mr. Gaspare Campari bought the "Caffè dell'amicizia" in Novara. In those same years, Gaspare Campari developed the recipe for Bitter Campari, which has remained secret and unchanged today. After a couple of years in which Gaspare tries to do business between Novara and Turin, he manages to get permission to open a bar in Milan. The first place opened in 1862 under the "Coperto dei Figini" and was called Caffè Campari. The bar was later moved to the Galleria Vittorio Emanuele II on the corner with Piazza Duomo.

Rum and Coca, one of the classic summer cocktails, the **long drink** Drunk in every part of the world, it is a drink rich in history and uncertain origins. The name seems to trace the birth of this drink to the island of Cuba, and to the achievement of its independence from Spain (Cuba Libre means precisely **Free Cuba**).

Gin

For every day

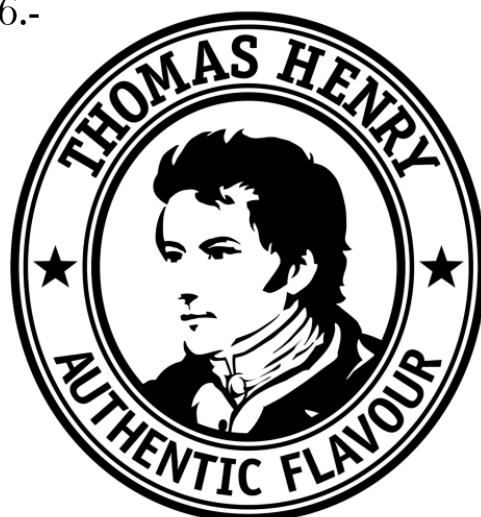

Hendrick's **Gin** was born in the small seaside village of **Girvan, Ayrshire**, in the **South West of Scotland**. This famous distillery overlooks the volcanic island of **Ailsa Craig**, an uninhabited territory that enriches popular mythology with several legends. The peculiarity of Hendrick's **Gin** is the distillation not in one, but in two stills. This particular set of stills, **the Bennet**, consists of an ancient copper vase dating back to 1860 and a **Carter-Head** from 1948. There are few specimens in the world.

"Did you know you can also play pool?!"

- Nicholas

In addition to the chromatic difference, the balls are also recognized through the unique numbering present on them, the "full" balls from No. 1 to No. 7, the "half" ones from No. 9 to No. 15. The game equipment is completed by two other balls: No. 8, which is black and is considered neither "full" nor "half", and the swing (with a white background) hit by the player through the billiard cue. At the beginning of the game the colored and numbered balls are grouped in a triangle in the upper half of the game table in a fixed position and composition with the ball No. 8 in the center, and it will be decided who among the two players will make the "split" or initial break (ie scatter the balls with a dry blow).

Once the break has been made, the game is called "open" and the category of "full" or "half" balls is assigned to the first player who "regularly" posts a ball. For a hole to be considered regular, the player must declare the ball he intends to hole, the hole in which he intends to do it and must not commit any foul during the same turn. It should be noted that no hole during an opening shot can be considered regular, and consequently the game is always open after the opening shot, even if one or more balls fall into the hole. From the assignment of the category the player has the obligation to hit one of his balls first and has the right to remain at the table as long as he continues to post his balls on a regular basis.

Once a player has holed all seven of his balls ("full" or "half"), he can hit and hole the ball No. 8.

Coffee? Is always a good idea!

Wake up with us, experts say

Espresso Macchiato

A story that begins in the beans, the berries of a plant discovered by chance by a shepherd from the Koffa plateau (from which the name "coffee" originates) in Ethiopia. One day his goats began to eat the berries and leaves of a coffee shrub; When night came, instead of sleeping, they began to graze with an energy never seen before. The shepherd, seeing the scene, identified the cause in the seeds eaten by his flock. Once collected, he roasted them, grinded them and made an infusion, thus obtaining coffee. Let's discover together the history of coffee in the world.
